GIFTS, GRANTS, AND BEQUESTS

The Board of Education is appreciative of public interest in and good will toward the schools manifested through gifts, grants, and bequests. The Board reserves the right, however, to specify the manner in which gifts are made; to define the type of gift, grant, or bequest which it considers appropriate; and to reject those which it deems inappropriate or unsuitable. If accepted, the Board will attempt to carry out the wishes of the donor.

The Board shall not discriminate in the acceptance and administration of gifts, grants, and bequests on the basis of sex, race, color, religion, national origin, ancestry, creed, pregnancy, marital status, parental status, sexual orientation, or physical, mental, emotional, or learning disability. Complaints of discrimination in the acceptance or administration of gifts, grants, or bequests are governed by the complaint procedure outlined in Policy 2260.

The Board shall provide written acknowledgement to the donor of any accepted cash donation of \$100 or more and any non-cash donation the value of which is \$100 or more. Such acknowledgement shall include the amount of cash or a description of any non-cash donation along with a good faith estimate of the value of such non-cash donation.

The Board shall provide any donor with appropriate tax forms in compliance with the requirements of the Internal Revenue Code.

Gifts, grants, and bequests shall become the property of the Board and will be subject to use by the District as determined by the policies and administrative guidelines applying to all properties, equipment, materials, and funds owned by the Board, subject to the Board's effort to comply with any specific wishes of the donor.

Any equipment purchased by a parent organization for use in the school, on District property, or at a District-related event shall be submitted to the Board, prior to purchase, so it can determine if the District would incur any liability by its use.

COMMEMORATION OF SCHOOL FACILITIES

From time-to-time, the Board of Education may wish to commemorate a school or District buildings and facilities by means of a plaque or naming the building/facility after a person. Such commemoration should be reserved only for those individuals who have made a significant contribution to the enhancement of education generally or the District in particular or to the well-being of the District, community, State or nation.

Naming of school district buildings and facilities is the responsibility of the Board of Education and shall be by a 2/3 majority vote of the entire Board. A facilities naming committee may be appointed by the Board President. Nominations in writing, which shall contain the rationale for such nomination, may be presented by the public.

- I. Criteria that may be considered when naming school buildings are:
 - A. Geographic location or section of the district: A building may be named after a geographic location and/or a section of the District it serves.
 - B. Individuals: The Board encourages appropriate memorials to recognize individuals.
 - C. Facilities within a building can be named after historical figures, deceased former employees and/or Board Members; or individuals/businesses, who have contributed significant financial resources toward the development of those facilities.

If a building or part of facilities is named after an employee, former Board, community member, business (es) or historical person the name shall remain in place for a minimum of 25 years. If any building or facility is built solely through the donations of an individual or business they retain the naming rights in perpetuity.

- II. Sponsorship and Recognition
The naming of facilities is different than sponsorships. Sponsorship is an agreement between the Board and a sponsor, in return for financial consideration, to identify that sponsor with a facility for a negotiated period of time.

The board may approve appropriate sponsorship agreements and recognition/memorial plaques it deems appropriate by a majority vote of the board.

DISPOSITION OF REAL PROPERTY

The Board of Education believes that the efficient administration of the District requires the disposition of property and goods no longer necessary for the maintenance of the educational program or the operation of the School District.

The Board shall direct the periodic review of all District property and authorize the disposition by sale, donation, trade, or discard of any property not required for school purposes.

All written offers on real property under consideration for disposition shall be presented as an item on the agenda of a public Board meeting. A preliminary review of offers to purchase or lease shall include: source of offer, date of offer, expiration date of offer, and intended use of property.

Written offers shall be referred to the Board Finance Committee for review and recommendations. Offers, when received, will be distributed to the members of the Board.

All property considered for lease or sale shall be reviewed by the Board prior to solicitation of offers. The solicitation of offers by the Board shall include an expiration date.

The authorized agents of the Board to review all purchase or lease offers pertaining to sale or lease of property shall be the District Administrator and the Board Finance Committee. The Board shall give final approval of all contracts.

In consideration of the best interest of the District and of the residents and taxpayers, the Board reserves the right to reject any and all offers at its sole discretion regardless of price and terms.

USE OF TOBACCO ON SCHOOL PREMISES

The Board of Education is committed to providing students, staff, and visitors with a tobacco and smoke-free environment. The negative health effects of tobacco use for both users and non-users, particularly in connection with second hand smoke, are well-established. Further, providing a non-smoking and tobacco-free environment is consistent with the responsibilities of teachers and staff to be role models for our students. The Board also recognizes, however, the right of individuals under State law to use lawful products, including tobacco, during non-working hours off District premises.

For purposes of this policy, "use of tobacco" means to chew or maintain any substance containing tobacco, including smokeless tobacco, in the mouth to derive the effects of tobacco, as well as all uses of tobacco, including cigars, cigarettes, pipe tobacco, chewing tobacco, snuff, any other matter or substances that contain tobacco, in addition to papers used to roll cigarettes and/or the smoking of electronic, "vapor," or other substitute forms of cigarettes, clove cigarettes and any other lighted smoking devices for burning tobacco or any other substance. Accordingly, the Board prohibits the use of tobacco in any form on District premises, in District vehicles, within any indoor facility owned or leased or contracted for by the District, and used to provide education or library services to children and at all District sponsored events.

VIDEO SURVEILLANCE AND ELECTRONIC MONITORING

The Board of Education authorizes the use of video surveillance and electronic monitoring equipment at various school sites throughout the District and on school buses.

The District Administrator is responsible for determining where to install and operate fixed-location video surveillance/electronic monitoring equipment in the District. The determination of where and when to use video surveillance/electronic monitoring equipment will be made in a nondiscriminatory manner. Video surveillance/electronic monitoring equipment may be placed in common areas in school buildings (e.g. school hallways, entryways, the front office where students, employees and visitors are permitted to freely come and go, gymnasiums, cafeterias, libraries), the school parking lots and other outside areas, and in school buses. Except in extraordinary circumstances and with the written authorization of the District Administrator, video surveillance/electronic monitoring equipment shall not be used in areas where persons have a reasonable expectation of privacy (e.g. restrooms, locker rooms, changing areas, private offices (unless there is express consent given by the office occupant), or conference/meeting rooms), or in individual classrooms during instructional times. Security staff and administrators are authorized to carry and use portable video cameras when responding to incidents.

Any person who takes action to block, move, or alter the location and/or viewing angle of a video camera shall be subject to disciplinary action.

Legible and visible signs shall be placed at the main entrance to buildings and in the areas where video surveillance/electronic monitoring equipment is in use to notify people that their actions/behavior are being monitored/recorded. Additionally, the District Administrator is directed to annually notify parents and students via school newsletters and the Student Handbook, and staff via the Staff Handbook, of the use of video surveillance/electronic monitoring systems in their schools.

Any information obtained from video surveillance/electronic monitoring systems may only be used to support the orderly operation of the School District's schools and facilities, and for law enforcement purposes, and not for any other purposes. As such, recordings obtained through the use of video surveillance/electronic monitoring equipment may be used as evidence in any disciplinary proceedings, administrative proceeding or criminal proceeding, subject to Board policy and regulations. Further, such recordings may become a part of a student's education record or staff member's personnel file.

The Board will not use video surveillance/electronic monitoring equipment to obtain information for the purpose of routine staff appraisal/evaluation or monitoring.

Recordings of students will be treated as confidential. Consequently, because the Board is bound by Wisconsin Pupil Records Statute and the Family Educational Rights and Privacy Act (FERPA), copies of video recordings containing personal identifiable information about students shall not be released except to school officials with legitimate educational interests. Parents or guardians of minor students, and students who are eighteen (18) years of age or older, who are charged with disciplinary violations may view relevant portions of any video recording related to the charge, upon written request to the building principal, provided that viewing the recording does not violate State and/or Federal law (i.e. the privacy rights of any other students whose images appear on the recording). Likewise, school personnel may view relevant portions of any video relating to any disciplinary charge against them, upon written request to the building principal, provided that viewing the recording does not violate State and/or Federal law (i.e. the privacy rights of any students whose images appear on the recordings). Otherwise, such confidential recordings shall only be released through subpoena or court order.

The Board shall maintain video surveillance/electronic monitoring recordings for a limited period. Any request to view a recording under this policy must be made within seven (7) days of the event/incident. Unless a formal complaint is being investigated, recordings shall be destroyed within twenty-one (21) days. If, however, action is taken by the Board/administration, as a result of a formal complaint or incident, recordings shall be kept for a minimum of one (1) year from the date of the action taken.

All Contractors who provide services to the District must certify to the District that they have reviewed all of their employees who will be on district property for any reason and that none of the employees appear on any sex offender registry. This certification must be renewed annually and provided to the Superintendent. Each contract will contain the requirements as stated herein.

COMPUTER TECHNOLOGY NETWORK, AND INTERNET ACCEPTABLE USE AND SAFETY

The use of technology is encouraged to engage students in their learning, facilitate resource sharing, encourage innovation, and increase communication. Technology use, with staff supervision, has become a key component of school curriculum as we incorporate technology use with all our subjects.

Appropriate technology use, safety, and security is everyone's responsibility. Classroom instruction should be included in all these areas. Technology access is intended and designed for educational purposes and governed by the terms and conditions outlined here.

The use of video (including YouTube and other web video sites) in the classroom should always be previewed for educational appropriateness before showing to students.

The District retains the right to filter, monitor, review, audit, intercept, access, and disclose all traffic sent and received (including email) over the District network. It is not private. Internet access is filtered as required under the CIPA requirements. Staff email is archived for seven years according to state law.

Email is the District's primary communication tool. Staff is expected to use District email for appropriate communication with other staff, parents, and students (when applicable). Staff is expected to check their email at least twice per day. District email is not to be used for personal business.

Professional staff is required to use Infinite Campus to maintain a record of students' attendance and grades. Daily attendance will be marked for each attendance period, and grades must be updated at least twice per week.

The District website is an important communication vehicle for informing the public about classroom curriculum, activities, and school programs. Staff is expected to maintain a faculty website that provides accurate, up-to-date information.

Professional staff should be teaching, moving around the classroom, and monitoring student activities when students are present. They should only be using the computer if it is directly related to the lesson, used for presentation, or taking attendance.

Professional staff members are responsible for keeping current with technology and maintaining a basic level of technology skills. An annual technology assessment may be required and additional training may be necessary to get to an acceptable performance level.

Personal cell phone use should be limited to prep time, break and/or lunch. A personal phone should not ring or be answered when supervising/teaching students.

District employees are personally responsible for the content they publish online, including social media sites. Your online behavior should reflect the same standards of honesty, respect, and consideration that you use face-to-face.

District equipment may not be used to create, download, view, solicit, seek, display, or distribute pornographic material. Wisconsin law now allows state regulators to revoke the license of teachers who are caught viewing pornography on school computers and publish the names of licensees under investigation for such misconduct.

TECHNOLOGY PRIVACY

The Board of Education recognizes its staff members' right to privacy in their personal lives. This policy serves to inform staff members of the Board's position with respect to staff-member privacy in the educational and workplace setting and to protect the Board's interests.

All computers, telephone systems, electronic mail systems, and voicemail systems are the Board's property and are to be used primarily for business purposes. The Board retains the right to access and review all electronic and voice mail, computer files, databases, and any other electronic transmissions contained in or used in conjunction with the Board's computer system, telephone system, electronic mail system, and voice mail system. Staff members should have no expectation that any information contained on such systems is confidential or private.

Review of such information may be done by the District with or without notice or the staff member's knowledge. The use of passwords does not guarantee confidentiality, and the Board retains the right to access information in spite of a password. All passwords or security codes must be registered with the Board. A staff member's refusal to permit such access may be grounds for discipline up to and including discharge.

Privacy in communication over the Internet and the Network is not guaranteed. To ensure compliance with the guidelines, the Board reserves the right to monitor, review, and inspect any directories, files, and/or messages residing on or sent using the Board's computers/network. Messages relating to or in support of illegal activities will be reported to the appropriate authorities.

The Board has software and systems in place that monitor and record all Internet, World Wide Web, and computer usage. The Board wants users to be aware that security systems are capable of recording, for each and every user, each World Wide Web site visit, the amount of time spent actively using the World Wide Web, each chat, news group access, e-mail message, and every file transfer into and out of our internal networks to the Internet. No District student or employee should have any expectation of privacy as to his/her Internet or World Wide Web usage, or the privacy of any electronic mail message, file, download, note, or other data stored on or transmitted or received through any Board computing facility. The Board reserves the right to review computing activity and analyze usage patterns, and may choose to publicize this data to assure that the Board's computing resources are devoted to maintaining the highest standards of educational benefit and employee productivity. Messages relating to or in support of illegal activities will be reported to the appropriate authorities. The use of passwords does not guarantee confidentiality, and the Board retains the right to access information in spite of a password.

Computers, electronic mail, and voice mail are to be used for business and educational purposes. Personal messages via Board-owned technology should be limited in accordance with the District Administrator's guidelines. Staff members are encouraged to keep their personal records and personal business at home.

Because the Board's computer and voicemail systems are to be used primarily for business and educational purposes, staff members are prohibited from sending offensive, discriminatory, or harassing computer, electronic, or voice mail messages.

The Board is interested in its resources being properly used. Review of computer files, electronic mail, and voicemail will only be done in the ordinary course of business and will be motivated by a legitimate business reason. If a staff member's personal information is discovered, the contents of such discovery will not be reviewed by the Board, except to the extent necessary to determine if the Board's interests have been compromised. Any information discovered will be limited to those who have a specific need to know that information.

The administrators and supervisory staff members authorized by the District Administrator have the authority to search and access information electronically.

In addition, staff members may not copy software on any Board computer and may not bring software from outside sources for use on Board equipment without the prior approval of the Director of Technology. Such pre-approval will include a review of any copyright infringements or virus problems associated with such outside software.

In accordance with State law, any staff member who sends an electronic message with the intent to frighten, intimidate, threaten, or harass another person or sends a message containing lewd, obscene, or profane language will be subject to appropriate discipline by the District and may be found guilty of a Class D misdemeanor.

No staff member will be required to provide District administration with access to personal internet accounts, such as social media accounts, that are password protected. This does not preclude administration from reviewing the contents of such accounts that are not restricted and are thus in the public domain, or from receiving information from those granted access to private information, provided that the District administration does not solicit the receipt of such information. Additionally, if private accounts are accessed from the District's computers, network and Internet services ("Network"), the staff member should have no expectation of privacy in the content of any files or records of their online activity while on the Network as prescribed in Policy 7540.04 – Staff Network and Internet Acceptable Use and Safety.

STUDENT EDUCATION TECHNOLOGY ACCEPTABLE USE AND SAFETY

Technology has fundamentally altered the ways in which information is accessed, communicated, and transferred in society. As a result, educators are continually adapting their means and methods of instruction, and the way they approach student learning to incorporate the vast, diverse, and unique resources available through the Internet. The Board of Education provides students with access to the Internet for limited educational purposes only and utilizes online educational services to enhance the instruction delivered to its students. The District's Internet system does not serve as a public access service or a public forum, and the Board imposes reasonable restrictions on its use consistent with its limited educational purpose. This policy and its related administrative guidelines and the Student Code of Conduct govern students' use of the District's computers, laptops, tablets, personal communication devices (as defined by Policy 7530.02), network, and Internet connection and online educational services ("Education Technology" or "EdTech"). The due process rights of all users will be respected in the event there is a suspicion of inappropriate use of the Education Technology. Users have no right or expectation to privacy when using the Ed-Tech (including, but not limited to, privacy in the content of their personal files, e-mails, and records of their online activity while on the network and Internet).

The Board encourages students to utilize Education Technology to develop the resource sharing, innovation, and communication skills and tools that are essential to both life and work. The instructional use of the Internet and online education services is guided by the Board's policy on instructional materials.

The Internet is a global information and communication network that provides a valuable opportunity to education and information resources to our students. The Internet connects computers and users in the District with computers and users worldwide. Through the Internet, students and staff can access relevant information that will enhance their learning and the education process. Further, the Education Technology provides students and staff with the opportunity to communicate with other people from throughout the world. Access to such a vast quantity of information and resources brings with it, however, certain unique challenges.

The Board may not be able to technologically limit access to services through its Education Technology to only those that have been authorized for the purpose of instruction, study and research related to the curriculum. Unlike in the past when educators and community members had the opportunity to review and screen materials to assess their appropriateness for supporting and enriching the curriculum according to adopted guidelines and reasonable selection criteria (taking into account the varied instructional needs, learning styles, abilities, and developmental levels of the students who would be exposed to them), access to the Internet, because it serves as a gateway to any publicly available file server in the world, opens classrooms and students to electronic information resources that may not have been screened by educators for use by students of various ages.

Pursuant to Federal law, the Board has implemented technology protection measures, that protect against (e.g., filter or block) access to visual displays/depictions/materials that are obscene, constitute child pornography, and/or are harmful to minors, as defined by the Children's Internet Protection Act. At the discretion of the Board or the District Administrator, the technology protection measures may be configured to protect against access to other material considered inappropriate for students to access. The technology protection measures may not be disabled at any time that students may be using the Education Technology if such disabling will cease to protect against access to materials that are prohibited under the Children's Internet Protection Act. Any student who attempts to disable the technology protection measures will be subject to discipline.

The Board utilizes software and/or hardware to monitor online activity of students and to block/filter access to child pornography and other material that is obscene, objectionable, inappropriate and/or harmful to minors. "Harmful to minors" is a term defined by the Communications Act of 1934 (47 U.S.C. 254(h)(7)) as any picture, image, graphic image file, or other visual depiction that:

- A. taken as a whole and with respect to minors, appeals to a prurient interest in nudity, sex, or excretion;
- B. depicts, describes, or represents, in a patently offensive way with respect to what is suitable for minors, an actual or simulated sexual act or sexual contact, actual or simulated normal or perverted sexual acts, or a lewd exhibition of the genitals;

- C. taken as a whole, lacks serious literary, artistic, political, or scientific value as to minors.

At the discretion of the Board or the District Administrator, the technology protection measure may be configured to protect against access to other material considered inappropriate for students to access. The technology protection measure may not be disabled at any time that students may be using the Network, if such disabling will cease to protect against access to materials that are prohibited under the Children's Internet Protection Act.

The District Administrator or Director of Technology may temporarily or permanently unblock access to websites or online education containing appropriate material if access to such sites has been inappropriately blocked by the technology protection measure. The determination of whether material is appropriate or inappropriate shall be based on the content of the material and the intended use of the material, not on the protection actions of the technology protection measure.

The District Administrator or Director of Technology may disable the technology protection measure to enable access for bona fide research or other lawful purposes.

Parents are advised that a determined user may be able to gain access to services on the Internet that the Board has not authorized for educational purposes. In fact, it is impossible to guarantee students will not gain access through the Internet to information and communications that they and/or their parents may find inappropriate, offensive, objectionable or controversial. Parents of minors are responsible for setting and conveying the standards that their children should follow when using the Internet.

The District Administrator shall prepare guidelines which address students' safety and security while using e-mail, chat rooms, instant messaging and other forms of direct electronic communications, and prohibit disclosure of personal identification information of minors and unauthorized access (e.g., "hacking") and other unlawful activities by minors online.

Pursuant to Federal law, students shall receive education about the following:

- C. the consequences of unauthorized access (e.g., "hacking"), cyberbullying, and other unlawful or inappropriate activities by students online;

Social Media Use

An employee's personal or private use of social media, such as Facebook, Twitter, MySpace, blogs, etc., may have unintended consequences. While the Board respects its employees' First Amendment Rights, those rights do not include permission to post inflammatory comments that could compromise the District's mission, undermine staff relationships, or cause a substantial disruption to the school environment. This warning includes staff members' online conduct that occurs off school property including from the employee's private computer. Postings to social media should be done in a manner sensitive to the staff member's professional responsibilities.

In addition, Federal and State confidentiality laws forbid schools and their employees from using or disclosing student education records without parental consent. See Policy 8330. Education records include a wide variety of information; posting personally identifiable information about students is not permitted. Staff members who violate State and Federal confidentiality laws or privacy laws related to the disclosure of confidential employee information may be disciplined.

Staff members retain rights of communication for collective bargaining purposes and union organizational activities.

ASSISTIVE TECHNOLOGY AND SERVICES

Students with disabilities have special challenges and may need assistive technology in order to more fully participate in their classrooms, homes, communities and workplaces. Through the use of assistive technology and services these students will have the opportunity to become more independent and self-reliant.

Each IEP team must include in their deliberations consideration of whether the use of assistive technology devices and services to aid students with disabilities is appropriate for each specific student. The Board also directs that students who qualify under Section 504 of the Rehabilitation Act be provided with assistive technology devices and services when deemed necessary.

Students having special needs but not requiring a formal IEP or 504 Plan according to law, which may include but are not limited to migrant students, homeless students, students living with poverty, and English Language Learners, will also be considered for assistive technology devices and/or services.

“Assistive technology device” means any item, piece of equipment, or product system, whether acquired commercially off the shelf, modified, or customized, that is used to increase, maintain, or improve functional capabilities of a child with a disability. The term does not include a medical device that is surgically implanted, or the replacement of such device.

“Assistive technology service” means any service that directly assists a child with a disability in the selection, acquisition, or use of assistive technology devices. Assistive technology services include:

- A. the evaluation of needs including a functional evaluation, in the child's customary environment;
- B. purchasing, leasing, or otherwise providing for the acquisition of assistive technology devices;
- C. selecting, designing, fitting, customizing, adapting, applying, maintaining, repairing, or replacing of assistive technology devices;

- D. coordinating and using other therapies, interventions, or services with assistive technology devices, such as those associated with existing education and rehabilitation plans and programs;**
- E. training or technical assistance for a child with disabilities, or where appropriate that child's family;**
- F. training or technical assistance for professionals (including individuals providing education and rehabilitation services), employers or other(s) who provide services to employ, or are otherwise, substantially involved in the major life functions of that child.**

The Board encourages the faculty to develop the appropriate skills necessary to effectively access, analyze, evaluate, and utilize assistive technology resources and assistive technology services.

The Board designates the District Administrator and the Director of Student Services as the administrator(s) responsible for initiating, implementing, and enforcing this policy and its accompanying guidelines as they apply to the use of assistive technology and services in the District.

ELECTRONIC MAIL

The Board of Education is committed to the effective use of electronic mail ("e-mail") by all District staff and Board members in the conduct of their official duties. This policy, as well as any guidelines developed pursuant to it are intended to establish a framework for the proper use of e-mail as an official business tool.

When available, the District's e-mail system must be used by employees for any official District e-mail communications. Personal e-mail accounts on providers other than the District's e-mail system may be blocked at any time due to concerns for network security, SPAM, or virus protection. Furthermore, District staff are expected to exercise reasonable judgment and prudence and take appropriate precautions to prevent viruses from entering the District's network when opening or forwarding any e-mails or attachments to e-mails that originate from unknown sources.

District staff shall not send or forward mass e-mails, even if the e-mails concern District business, without prior approval of the Technology Director or building Administration.

District staff may join list serves or other e-mail services (e.g. RSS feeds) that pertain to their responsibilities in the District, provided these list serves or other email services do not exceed the staff member's e-mail storage allotment. Staff members are required to keep their inbox and folders organized by regularly reviewing e-mail messages, appropriately saving e-mails that constitute a public record or student record and e-mails that are subject to a Litigation Hold, and purging all other emails that have been read.

Public Records

The District complies with all Federal and State laws pertaining to electronic mail. Accordingly, e-mails written by or sent to District staff and Board members may be public records, or education records if their content includes personally identifiable information about a student. E-mails that are public records are subject to retention and disclosure, upon request, in accordance with Policy 8310 – Public Records. E-mails that are student records should be maintained pursuant to Policy 8330 – Student Records. Finally e-mails may constitute electronically stored information ("ESI") that may be subject to a Litigation Hold pursuant to Policy 8315 – Information Management.

State and Federal law exempt certain documents and information within documents from disclosure, no matter what their form. Therefore, certain e-mails may be exempt from disclosure or it may be necessary to redact certain content in the emails before the e-mails are released pursuant to a public records request, the request of a parent or eligible student to review education records, or a duly served discovery request.

E-mails written by or sent to District staff and Board members by means of their private e-mail account may be public records if the content of the e-mails concerns District business, or education records if their content includes personally identifiable information about a student. Consequently, staff shall comply with a District request to produce copies of e-mail in their possession that are either public records or education records, or that constitute ESI that is subject to a Litigation Hold, even if such records reside on a computer owned by an individual staff member, or are accessed through an e-mail account not controlled by the District.

Retention

Pursuant to State and Federal law, e-mails that are public records or education records, and e-mails that are subject to a Litigation Hold shall be retained.

The District maintains archives of all e-mails sent and/or received by users of the District's e-mail service. Staff members are required to forward copies of any e-mails received in their personal e-mail account(s) not affiliated with the District server to their District e-mail account so that these records are also archived for future retrieval, if necessary.

Unauthorized E-mail

The Board does not authorize the use of its proprietary computers and computer network ("network") to accept, transmit, or distribute unsolicited bulk e-mail sent through the Internet to network e-mail accounts. In addition, Internet e-mail sent, or caused to be sent, to or through the network that makes use of or contains invalid or forged headers, invalid or non-existent domain names, or other means of deceptive addressing will be deemed to be counterfeit. Any attempt to send or cause such counterfeit e-mail to be sent to or through the network is unauthorized. Similarly, e-mail that is relayed from any third party's e-mail servers without the permission of that third party, or which employs similar techniques to hide or obscure the source of the e-mail, is also an unauthorized use of the network. The Board does not authorize the harvesting or collection of network e-mail addresses for the purposes of sending unsolicited e-mail. The Board reserves the right to take all legal and technical steps available to prevent unsolicited bulk e-mail or other unauthorized e-mail from entering, utilizing, or remaining within the network. Nothing in this policy is intended to grant any right to transmit or send e-mail to, or through, the network. The Board's

failure to enforce this policy in every instance in which it might have application does not amount to a waiver of its rights.

Unauthorized use of the network in connection with the transmission of unsolicited bulk e-mail, including the transmission of counterfeit e-mail, may result in civil and criminal penalties against the sender and/or possible disciplinary action.

The District retains the right to monitor or access any District e-mail accounts at any time. Users should not expect that their communications sent or received through the District e-mail system will remain confidential and personal.

Authorized Use and Training

Pursuant to Policy 7540.04, staff and Board members using the District's e-mail system shall acknowledge their review of, and intent to comply with, the District's policy on acceptable use and safety by signing and submitting Form 7540.04 F1.

JOINT USE OF FACILITIES/INTER-LIBRARY LOANS

The Board of Education advocates the joint expenditure of District funds and municipal or county funds to provide those facilities from which the entire community, children and adults alike, may derive benefits.

In accordance with this policy, the Board shall, as either opportunity or need arises, and as it is entitled to do so by law, join with the City of Portage in acquiring, improving, equipping, operating, or maintaining such jointly used facilities as recreational and cultural areas and/or facilities.

The Board also authorizes District participation in Inter-Library Loan programs.
