

AHERA NOTIFICATION

As a result of the Federal Asbestos Hazard Emergency Response Act (AHERA), all primary and secondary schools are required to develop and implement a plan for managing all building materials which contain asbestos. The district proposed and the state approved such a plan in 1988. A copy of the plan is available for review in the office of the Director of Buildings and Grounds. They can be reached at (608) 742-4879 ext 4143. As part of the above referenced act, all buildings are to be re-inspected every three years. Such inspection was recently conducted for the district by Advanced Health & Safety, LLC. The district is pleased to announce that practically all asbestos-related materials have been removed. The district will continue to take all necessary steps to ensure full compliance.
